Editorial

Ray Dalio, an American investor and hedge fund manager, said that, “The greatest gift you can give someone is the power to be successful. Giving people the opportunity to struggle rather than giving them the things they are struggling for will make them stronger.” Here at the International Journal of Innovation and Multidisciplinary Research (IJAMR), we give the “opportunity to struggle,” by providing a platform for students, scholars, researchers and academicians.

International Journal of Innovation and Multidisciplinary Research (IJAMR) is a peer-reviewed multidisciplinary journal, which publishes research articles four time a year.

The call for papers was declared far and wide, and received enormous contribution. After going through a rigorous peer-review process, we have short-listed 12 articles comprising of articles from multi-disciplinary areas. These research articles range from advantages, challenges and issues related to Library Information Sciences, Biological Sciences, Social science, Food Sciences, Information & Data Sciences, Language & Literature, Environmental Studies to Arts & Humanities in the current context.

International Journal of Innovation and Multidisciplinary Research (IJAMR) believe in the incredible potential that the youth hold. It is crucial to promote good researches and induce a research temperament among them. Our objective is to make the publication processes for the new researchers easy and pave a way for them to move towards a holistic research environment where they may freely do researches and be read widely.

The ultimate objective of International Journal of Innovation and Multidisciplinary Research (IJAMR) is continue publishing high quality research articles that addresses to various topics and issues; and provides new horizons to different disciplines.

In the subsequent issues of International Journal of Innovation and Multidisciplinary Research (IJAMR), we will be bringing in more multi-disciplinary research articles covering both the aspects of information and management etc. We are sure that readers will enjoy reading the articles and also contribute to the journal substantially in the future issues.

Prof Payal Mago

Editor-in-chief

IJAMR

Special Commentary

I am very happy that the Shaheed Rajguru College of Applied Sciences for Women is launching its own journal "International Journal of Innovation and Multidisciplinary Research" (IJIAMR). I am sure this journal will be sought after by academicians who would like to publish their papers in diverse fields. The uniqueness of the journal lies in the fact that firstly, it is multidisciplinary in nature; secondly, it also calls for papers wherein people have done some innovation in their own field of study or brought about some innovation in the society; and thirdly, it is also going to take care of small new research projects which someone may have carried out that can be published as a small communication. Therefore, this journal will encourage the researcher, the teacher who may have done some innovation in teaching as well as entrepreneurs who may have some innovation which one can share on this platform. The idea that review articles will also be published is very encouraging for the students and teachers and it can be used by teachers for teaching purposes and by the students to update themselves. Further, an inhouse journal will also create a research ecosystem in the college.

I look forward to the varied kinds of papers, review articles and innovations which will be published in the quarterly journal as I am sure it will attract the educationists for interesting reading.

Best wishes for the new Journal.
